

## The many benefits of OmniMetrix monitoring

- Wireless monitoring 24x7x365
- Unlimited GPS interruption
- Instant alarm notifications via email or text
- Custom reporting
- OmniView™ secure web-based management
- Date/time stamped event logs
- Unlimited data archiving and exporting
- Patented, over-the-air software updates
- StormSense™ lightning protection

**OmniMetrix Monitoring  
and Control Technology is  
the Most Reliable and  
Accurate in the Cathodic  
Protection Industry!**

Keeping You Connected

**Connect instantly from anywhere**

**Preventing  
pipeline  
corrosion  
requires the  
best  
technicians  
with the best  
equipment**

Corrosion never sleeps and the tools you use to prevent it shouldn't either. OmniMetrix provides the most accurate and longest lasting pipeline monitors in the industry. Our cathodic protection monitoring solutions can be found on rectifiers, test station and bonds and work 24x7x365 to provide vital information you need to make important decisions about your pipeline. With our modular and customizable solutions, OmniMetrix is the leader in remote monitoring solutions.

### **It's Your Data**

With cellular transmission through OmniMetrix, cathodic protections specialist have access to unlimited data gathering for one flat rate. Pull whatever information you need as many times as you like at no additional cost; it's your data.

### **StormSense™**

StormSense, a feature exclusive to OmniMetrix, monitors the atmosphere for lightning activity. When an approaching storm is detected, StormSense disconnects its relays to isolate the monitor from the rectifier, significantly reducing the probability of lightning damage.

### **Unlimited GPS Interruption**

The Hero Rectifier Monitor includes GPS-synchronized rectifier interruptions. Command one or multiple rectifiers remotely through our online portal, OmniView. Schedule on times, off times and daily schedules simultaneously.

### **Applications & Benefits**

- Rectifier, test station and bond monitors
- AC current density measurements
- Pipe-to-soil
- Cellular or satellite
- No custom software
- Instant alarm notifications via email and/or text
- Free over-the-air software updates
- Eliminates manual data collection costs
- USA based customer support team

**For over 20 years  
OmniMetrix has been an IoT/  
M2M industry leader  
dedicated to the remote  
monitoring and control of  
critical assets.**
